

TRADE STATISTICS BULLETIN

1 July 2009 – 30 November 2009

CONTAINER TRADE

- Container trade performance for year to date (YTD) November 2009/10 was 0.816 million TEUs, down 1.2% on the same period last year.
- Sydney Ports' container throughput hit a record high in November 2009 with 181,700 TEUs which was an increase of 7.9% on the same period last year. This is the second consecutive record month for containers. Predominately impacting on this result is the increase in imports of full containers (4.3%) and the stronger exports during the month of November 2009.
- Total full container imports for YTD November 2009/10 reached 410,700 TEUs, down 1.5% on the corresponding period last year. The leading import regions were dominated by East Asia (48%), South East Asia (15%) and Europe (14%), which combined account for 77% of total full container imports through the ports of Sydney.
- Full container exports for YTD November 2009/10 reached 184,900 TEUs up 0.6% compared to the same period last year. The higher exports of cereals, non-ferrous metals and cotton have been the primary drivers of the growth. Cereal exports continue to have strong growth as a result of favourable growing conditions in the North West and Central West regions of the State, up 76.5% YTD November 2009/10 on the same period last year. Cotton exports increased by 67.2% as growing conditions returned to favouring northern NSW, the traditional dominant cotton growing region.
- Exports of empty containers for YTD November 2009/10 decreased 2.9% compared to the same period last year, reaching 210,200 TEUs. Empty container exports performance is directly linked to the strength of full container imports.

CONTAINERISED COMMODITIES

- The top imported commodities were headed by, miscellaneous manufactures, machinery and transport equipment and chemical products, which combined represented 57.0% of all containerised goods imported through Sydney's ports.
- The leading containerised exports in TEUs through the ports of Sydney for YTD November 2009/10 were chemical products, cereals and machinery and transport equipment.

NON-CONTAINERISED TRADE

- Non-containerised imports for YTD November 2009/10 decreased 5.9% compared to the corresponding period last year, to 5.3 million mass tonnes. This was due mainly to cessation of motor vehicle trade and a decrease of dry bulk imports of 27.3%. However the YTD November result for non-containerised imports was partially offset by crude oil imports which increased by 4.1% on the same period last year.
- Non-containerised exports decreased 11.1% to 262,900 mass tonnes for YTD November 2009/10. This decrease was mainly attributable to reduced propane coastal and New Zealand exports and lower refined oil exports.

TOTAL TRADE

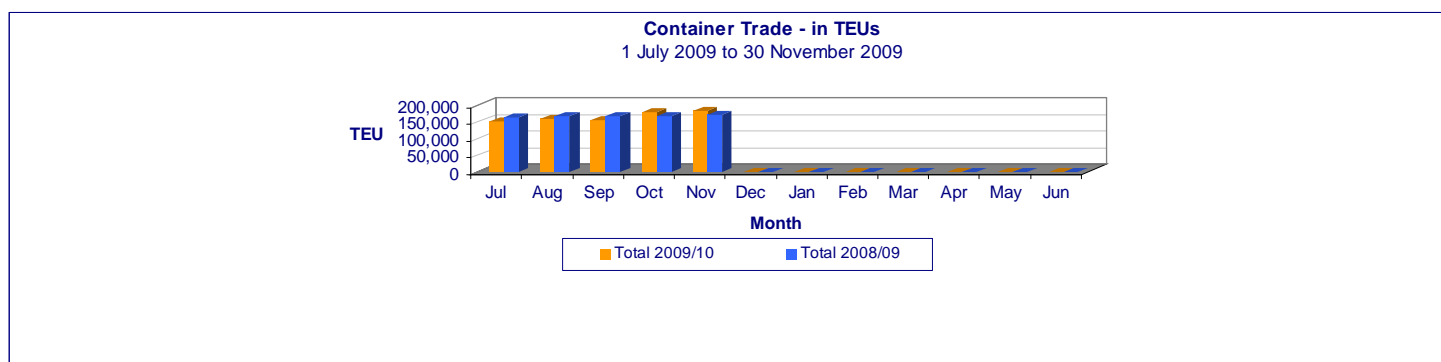

- Total trade for the financial year to 30 November 2009 was 11.8 million mass tonnes — a decrease of 4.9% compared to the same period last year. This was mainly as a result of the cessation of the motor vehicle trade through Glebe Island in November 2008
- Non-containerised trade was 5.5 million mass tonnes (representing 47.1% of total trade in mass tonnes). Containerised trade was 5.8 million mass tonnes (49.1% of total trade in mass tonnes). The balance (0.45 million mass tonnes) comprised empty containers (3.8% of total trade in mass tonnes).

** Total trade in mass tonnes terms comprises non-containerised trade and containerised trade (including empty containers) through Sydney's ports.*
